EF Hutton Initiating Research on Cryptocurrencies Helping Investors Makes Sense of This Complex Market

SPRINGFIELD, Ohio, September 5, 2018, /PRNewswire/ EF Hutton, a unit of HUTN, Inc. (OTC: HUTN) announced today that its initiating research on a wide range of Digital Assets such as Tokens and Coins often referred to as “Cryptocurrencies”. The first report is to be available today.

This week, EF Hutton will initiate coverage of Bitcoin (BTC), Ethereum (ETH), Ripple (XRP), EOS (EOS), Litecoin (LTC), Bitcoin Cash (BTH), Cardano (ADA) and will rate each. EF Hutton will also provide equity research coverage of companies involved in cryptocurrencies and other digital assets. Company reports will start with HUT 8 Mining (OTC: HUTMF) and HIVE Blockchain Technologies (OTC: HVBTF). The rating scale is one star to five stars with five-stars representing a positive outlook and one-star representing a negative outlook. The EF Hutton’s research reports will be available on a monthly subscription basis. Subscribers choose one of three subscription plans – Basic, Standard and Premium. Pricing is available on the website. Monthly subscriptions are available at www.efhutton.com/crypto-research

When EF Hutton Talks, People Listen. Subscribers receive institution-quality research containing actionable intelligence available in an extensive array of reports, such as:

- Daily Crypto Market Report,
- Instrument Report and includes ratings/ recommendations on specific coins/tokens
- Equity Research Report on public companies focused on digital assets and related blockchain technology

EF Hutton Leading in Digital Finance

Market research is a \$19 billion market, according to statistica.com, and EF Hutton is the only nationally-branded financial firm to provide this advanced level of research to individuals interested in this emerging asset class. Only a small percentage of U.S. investors hold digital assets like Bitcoin. However, many investors are interested but are refraining from purchasing because they cannot find research from sources they trust. EF Hutton intends to provide keen insights and deep analysis that make its research reports “must read” by individuals and institutions interested in this asset class

EF Hutton CEO, Christopher Daniels, a thought-leader in digital assets and FinTech, is a featured speaker at Block World, the world’s largest blockchain conference held in San Jose. He will be speaking about investing in Digital Assets at 9:30 am on Friday, September 14.

“A great many investors are confused by the rapid developments in this new asset class,” Daniels explained. “They know they can trust EF Hutton to guide them and to inform them about developments in this asset class. This is the first of many initiatives we are taking that adds value for our clients and customers.”

This is one of several HUTN initiatives in crypto. For example, EF Hutton’s affiliate, Megga Inc. a HUTN subsidiary, has already developed a virtual currency called MeggaCoin as part of its meggalife.com social platform, which is in the beta

test stage. Meggalife.com allows people to mine MeggaCoin. Meggacoin is a utility token that can be redeemed for cash.

EF Hutton plans to further extend its expertise in cryptocurrencies and other digital assets. The company believes this research subscription initiative will add \$.12 per share to HUTN revenue in 2019.
